

## Statement 2020-07-WP

### ICWP Principle Statement on Facilitating Water Planning Knowledge Sharing among State/Interstate Water Planners

Adopted by the ICWP Board of Directors on December 3, 2020; Sunset/Review December, 2023

#### **Statement of the Issue:**

The Water Planning Committee seeks to share knowledge about water planning and available resources to support the water resources planning activities of ICWP members.

#### **Why Important to ICWP membership:**

With ICWP's diverse and growing membership, members have access to a network of water resource professionals from all over the nation and with a wide range of experience.

The Water Planning committee provides a platform for members to discuss, share experiences, and mentor each other on shared water resources topics. Members discuss topics such as state organization and legislative influence for water resources planning, funding strategies for water resources activities, state water planning, state drought and flood planning, and more.

#### **ICWP Recommended Action/Position:**

--ICWP will develop a list of Planning Best Practices for Water Resources Planning—these Best Practices would include practices for communicating planning benefits
