

CUAHSI
allied for water science

Read-Ahead materials for CUAHSI

About CUAHSI

CUAHSI facilitates the interdisciplinary advancement of water science by making it easier for the water science community to do their work. CUAHSI's community consists of students, educators, volunteer scientists, outreach coordinators, environmental and watershed organizations, and corporate entities. All who are involved in water science, water-resources management, or water-resources protection and enhancement are part of the CUAHSI community.

Community

CUAHSI's membership includes more than 130 U.S universities, colleges, other non-profit organizations, and international affiliates who recognize the need for interdisciplinary collaboration and innovative thinking to advance water science.

CUAHSI's member representatives guide the direction of CUAHSI by electing the Board of Directors, voting on important business items, and sharing CUAHSI information within their organization.

CUAHSI provides an [Annual Report](#) of our work to Member Representatives.

Data and Technical Services

CUAHSI's data services and software provide solutions to support many different workflows and use cases, and all aspects of the data management life cycle, from collecting, storing, and analyzing data, to sharing, publishing, and citing data, thereby enabling reproducibility in the water sciences.
