

Understanding THIRA, an ICWP Resource

What is THIRA?

The Threat and Hazard identification and Risk Assessment (THIRA) is FEMA's three step risk assessment process that helps communities understand their risks and what they need to do to address those risks by asking the following core questions...

Core Questions

- What threats and hazards can affect our community?
- If they occurred, what impacts would those threats and hazards have on our community?
- Based on those impacts, what capabilities should our community have?

Where to start

Go to the FEMA National Risk and Capability site for THIRA resources

Browse examples and further resources, visit the National THIRA page, and assess your situation. Once a preliminary THIRA is conducted, the next step is Stakeholder Preparedness Review.
